NAJI AHMAD JAVAHIR

Software Engineering Undergraduate
Colombo, Sri Lanka | +94 75 801 4299 | naji.a.javahir@gmail.com
LinkedIn | GitHub| Portfolio

SUMMARY

Software Engineering undergraduate with experience in Java, Python, TypeScript, React, Spring Boot, REST APIs, microservices, SQL, Docker, Git, and AI integration. Strong foundation in OOP, SOLID principles, design patterns, testing, and problem solving.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT) 2023 – Expected 2027
BSc (Hons) in Information Technology Specializing in Software Engineering

SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL
Backend & APIs: Spring Boot, Node.js, Express.js, REST APIs, Microservices, JPA/Hibernate
Frontend: React.js, Angular, React Native, HTML5, CSS3
Databases: MongoDB, MySQL, PostgreSQL, SQL Server, Oracle, Database Design
AI Development: LLM Integration, RAG, Embeddings, Vector Databases, Agentic AI, Prompt Engineering
Testing & Quality: TDD, Jest, Supertest, Postman, API Testing, Integration Testing, Debugging
DevOps & Cloud: Git, GitHub, Docker, Kubernetes, CI/CD, Linux, Cloud Fundamentals
Software Engineering: OOP, Data Structures & Algorithms, Design Patterns, SOLID Principles, SDLC, Agile/Scrum
Soft Skills: Communication, Teamwork, Problem-Solving, Adaptability, Time Management, Leadership

PROJECTS

ReVolve – Circular Economy Service Platform
Technologies: React.js, Node.js, Express.js, MongoDB, REST APIs, JWT, Docker | Live Demo

- Developed a full-stack platform supporting customer, service provider, recycler, and administrator workflows.
- Implemented REST APIs with JWT authentication, role-based access control, OTP verification, and Google Maps integration.
- Designed database-driven workflows and managed application data using MongoDB.
- Tested and debugged backend APIs using Jest, Supertest, and Postman.

HerPath – Women's Safety & Location Intelligence Platform
Technologies: TypeScript, React Native, Expo, Node.js, Express.js, MongoDB, REST APIs | GitHub

- Contributed to a mobile women's safety platform with incident reporting, safety mapping, and location-based information.
- Developed the map and location intelligence component with markers, filtering, area summaries, and interactive visualizations.
- Integrated REST APIs with privacy-aware incident and geospatial data.
- Used Git feature branches, pull requests, testing, debugging, and API integration in a collaborative workflow.

CareBridge – Healthcare Microservices Platform
Technologies: Node.js, Express.js, MongoDB, REST APIs, Microservices, Docker, JWT | GitHub

- Developed a healthcare platform using microservices and a centralized API Gateway.
- Built services for authentication, appointments, notifications, payments, telemedicine, and administration.
- Implemented REST APIs, JWT authentication, database operations, and service integration.
- Used Docker Compose, API testing, debugging, and Git/GitHub for collaborative development.

LANGUAGES

Tamil (Native) | English (Fluent) | Sinhala (Basic)
